CHICAGO - ILLINOIS

Miss Technician

is the reigning queen of the 1949 Junior Prom. C.V.S. has chosen her first glamour gal, and we find her surrounded by her court of honor and four closest rivals. *Seated:* DOLLY POPOVICH, FLORENCE MURAWSKI, and CAROL CHANDLER. *Standing:* JACQUIE JANSSEN and AUDREY PAUL. These lovely ladies, each with the gentleman of her choice, headed The Grand March of Vocational's gala soiree of the year.

FLORENCE MURAWSKI was elected most popular sweetheart from among a group of twenty activity sponsored candidates. Excellent scholarship places her in the Honor Society, and she is not only a member of the Girls' Advisory Council but is also active in the Glee Club, the Office Aids, and the 3B Leaders. Perhaps you remember her as the "I" in the Technician Show.

The Vocations

Our wandering shutter-man exposes MR. SHARKEY pointing out the intricacies of architecture to BILL CODY and AUDREY PAUL. Audrey is the only member of the fairer sex to compete successfully against the young men in Architectural Drafting. Come to think of it, she didn't do too badly against her sister contestants for the title of MISS TECHNICIAN.

THE lens seems to have caught our *TECHNICIAN* editor, GENE SCHATTENBERG, in an English class with Miss McDADE in the Chappel wing, better known as "Hogan's Alley"; AL BOBECK must be an English student too. MR. ZULEGER appears to be quite satisfied with the fender repair in progress, and Miss LYON is obviously admiring ARLENE ROGALA's advertising poster. The Commercial Art department has been more than helpful to this publication in lending an adept hand particularly in caricature.

WARREN PIETSCH, JOHN GRATKINS, and RICH CLEARY are in focus attempting to confuse Mr. L. PETERSON with electronics problems. Cleary has published one successful article in his chosen field and has shown his versatility by amazing the audience with his fine singing voice as MC in the recently popular Variety Show. Our itinerant photographer presented us with "Frankenstein and the Stinger" as a result of a visit among Mr. Kuban's Arc Welders. The "twelve" may indicate that they are cheaper by the dozen — we're confused too!

The Director

To the Graduates

About four years ago you completed the 8th grade and made plans to enter high school. When you looked forward to four years of school attendance, it appeared to be a long time until you would be graduated from high school. That time has arrived and you are now looking back. It perhaps seems like only a few months at the most.

You have had some successes and some experiences which were not so satisfying. You have made some friends, and now you can see where you failed to make some people more friendly toward you. It is now evident to you that upon looking back, things appear much different than when looking ahead.

We are told by older folk that each year seems to be shorter. If we can accept this, and the swiftness with which your high school years have passed, perhaps it would be well to give serious thought to the future. Let us plan for the future as we plan an extended trip. We get a map of the countryside to be crossed, and we note the destination; then we decide upon the route. As we proceed with the trip, we may meet various obstacles which cause detours. However, the direction has been determined, and the destination set, so that progress continues. If we were to start without plans, there would be no

way of determining whether we were progressing in the right direction or when we had arrived.

Much reference has been made in poetic writing of life as a journey. So your life will pass as a journey. Have you set a goal? Do you know in which direction you should start to attain that goal? It might be well to remember that the time will pass as your high school years have passed.

The four years at C.V.S. have given you training which makes it possible for you to plan for and to live a most satisfying life. It is my sincere hope that each of you will use that training to attain a happy and successful life.

CLAUDE H. EWING

To My Son

I will not say to you, "This is the Way;
walk in it."

For I do not know your way or where the
Spirit may call you;

It may be to paths I have never trod or ships
on the sea leading to unimagined lands
afar,

Or haply, to a star!

Or yet again

Through dark and perilous places racked
with pain and full of fear

Your road may lead you far from me or
near —

I cannot guess or guide, but only stand aside.
Just this I'll say:

I know for very truth there is a way for
each to walk, a right for each to choose,
a truth to use.

And though you wander far, your soul will
know that true path when you find it.

Therefore, go!

I will fear nothing for you day or night!

I will not grieve at all because your light
is called by some new name;

Truth is the same!

It matters nothing to call it star or sun —

All light is one.

Leaders....

IN INDUSTRY • EDUCATION • COMMUNITY

The administrative staff and faculty of the Chicago Vocational School are keenly aware of the tremendous challenge which leadership in any field imposes.

We have undertaken with unbounded enthusiasm, the inspiring task of guiding what is destined to be the finest vocational school in the world. Our leadership has been greatly facilitated by a superb plant, matchless equipment, and an unrivaled faculty. To these unusual advantages we unhesitatingly add the privilege and honor of being identified with one of the world's foremost industrial areas and associated with its public spirited leaders in every field of human endeavor.

In a very appropriate sense the Chicago Vocational School is the immensely satisfying realization of a truly great objective by local citizens and leaders in commerce, industry, education, and civic affairs. These far-sighted Chicagoans recognized the need for a technical training institution of fabulous proportions capable of supplying the ever-increasing necessity for skilled craftsmen in many fields. They

took their problem to the Board of Education, which authorized a study of the best features of the finest technical schools in the country for the purpose of planning and constructing a school which would answer the need and embody the most advanced ideas. Our Chicago Vocational School is the impressive proof of their vision, wisdom, and good citizenship.

From the moment of its auspicious opening, through the arduous war years to the bright and happy present, the Chicago Vocational School has enjoyed the most pleasant associations with all the people of the community and its many famous and successful businesses. Community leaders representing civic, fraternal, labor or industrial organizations have always been received at C.V.S. with the cordiality and respect their leadership and their people merit.

The school is justly proud of its flawless reputation for ready, willing, and able assistance and cooperation in all worthy community projects. Its brief but distinguished history affords startling proof that it is indeed a school of the people, by the people, and for the people.

INTERNATIONAL HARVESTER COMPANY
Wisconsin Steel Division

We of Wisconsin Steel Works, International Harvester Company, are most appreciative of the splendid cooperation demonstrated by the faculty of the Chicago Vocational High School in connection with our "Employee-Apprentice" and "Off-Hours" educational program.

R. A. LINDGREN
General Superintendent

ROBERT E. L. BROOKS
Incorporated

As one of the original sponsors of the Chicago Vocational School during my term as president of the South Chicago Chamber of Commerce, it has been my pleasure to see this live and progressive institution develop, under the able guidance of its directors and teaching staff, into one of the most vital educational factors in the young people's lives in our community.

Before final approval was given on the plans of this institution, a group of industrial and civic leaders from Southeastern Chicago, together with members of the staff of the architectural, legal, and educational departments of the Chicago Board of Education, toured a number of cities inspecting vocational schools. Many fine suggestions were received, and most of them were included in the final plans of the building program.

In my humble opinion as a layman, we have one of the finest vocational schools in America.

FRANK M. STANLEY
President

THE DAILY CALUMET

We of this district, who waged a strenuous campaign for establishing the Chicago Vocational School in this region, feel that its outstanding service and achievement thus far compensated for all of our efforts. I am keenly enthusiastic over its educational contribution and extreme value to our community, its pre-eminence in our city, and the distinctive role it plays, educatively, in national institutions.

JOHN HANBERG
Managing Editor

The school reflects the ideals of its community. A school conceived and established to meet needs must enhance the value of the community socially as well as in terms of real and personal property if it be successful.

HEROLD C. HUNT
General Superintendent of Schools

The program of education for youth in a democracy is not complete without vocational training. One of the first steps in the attainment of good citizenship is the ability to enter gainful employment.

HOBART H. SOMMERS
*Assistant Superintendent in charge
of Vocational Education*

SOUTH CHICAGO
Chamber of Commerce

A number of our members were active in planning and supporting the project of erecting a large and comprehensive vocational school which was completed just prior to the war.

Authentically described as the most complete and best equipped institution of its kind, and also because of the industrial background of our community, Chicago Vocational School will continue to be one of the major centers of interest and support to the members of our organization. We look upon this institution with the civic pride of an achievement.

Best wishes for continued success to the faculty and the students of Chicago Vocational School.

DR. T. E. URBANEK
President

FORMER ALDERMAN AND
FEDERAL CONGRESSMAN

When it was originally proposed to build a vocational high school in Chicago, the southeastern sector of the city immediately recognized the importance of such an institution within its own great industrial area. Civic leaders, industrial officials, as well as officials of union labor and the public joined in a campaign to have the school erected adjacent to, what is perhaps, the greatest industrial part of Chicago.

During the war the school was an invaluable aid to the Federal Government in training men for the Navy. Since its restoration to the Board of Education, it has done a tremendous service.

In my approximate twenty-five years of public career, no effort has given me greater pride than the humble part I was permitted to play in the successful endeavor to have this high school located in the center of our great American workshop known as: "South Chicago—Calumet".

My very best wishes for the continued success of the Chicago Vocational School and my congratulations to those who have so splendidly performed the successful pioneer service.

W. A. ROWAN

CITY COUNCIL
City of Chicago

Regarding Chicago Vocational School, which is one of the best of its kind in the world, I want to say that it has done much for the industry located in Southeast Chicago, in supplying capable, skilled, and well trained technicians.

The need of a vocational school in this community has been felt for many years. Employers are happy to hire well qualified help in any line of endeavor, and I, as a representative of the people living in this community, want to convey to you my sincere thanks for the splendid job you are doing.

This is

The casual visitor to this edifice is slightly stricken with awe by what the 22 acre tract contains. The fifty-four shops, sixty-four classrooms, eighteen drafting rooms, and six gyms are sufficient for his confusion without mention of the airplane hangar, the auditorium, the natatorium, the lunchroom, and the ample office space.

Can you imagine washing 36,553 panes of glass—all in outside windows? The lineal measurement of the corridors equals the length of the Golden Gate Bridge plus the height of the Empire State Building. We haven't mentioned the Club room, bakery, and rifle range which are in the basement. Come and see us and bring your bicycle.

CLASS OF

January 1949

The members of the class of January 1949 spent their first year of study at some other high school. They entered Chicago Vocational School as sophomores when the school was located at 80th Street and Normal in its temporary, wartime quarters. With the exodus of the United States Navy, the class moved into our beautiful permanent quarters where they finished their junior and senior years. Some of them have gone on to higher institutions of learning. Many have been placed in industry. The staff offers them congratulations and every wish for success in their chosen fields.

VOCATIONAL TRAINING

Many questions are asked the graduates, the faculty members, and the administrators of this educational institution. Among them are: "What is the difference between a vocational high school and a regular high school?" "Is a vocational high school the same as a technical high school?" "Is a vocational high school a prep school?"

Perhaps it is incumbent upon us to attempt an answer to some of these questions. The regular high school is a preparatory school in the sense that its curriculum is set up to prepare its graduates for further study in an institution of higher education, namely, the colleges and universities. In these schools one finds a hard and fast course of study leading toward the arts, sciences, and professional studies, with a minimum of time spent in the technical fields. The technical high school provides an enriched curriculum for technical fields but still adheres to the courses prescribed for preparation for further training at a higher level. The vocational high school is perhaps the greatest prep school of them all. It aims to prepare its graduates for a vocational niche into which they can fit and successfully compete for a livelihood without higher formal training. The greatly enriched curriculum, the lengthened day, the latest possible industrial and plant equipment, the highly specialized and well trained staff, are all part of the plan to offer greater opportunity for the student to experiment, find his niche, and be guided to an industrial organization where he can compete with his fellow citizens with great hope of economic success. Should the student decide that he wants to continue in his chosen field at a higher educational level, the flexibility of the vocational curriculum provides sufficient elective subjects to prepare him for college.

HALL OF FAME

In any large organization there are heroes, sung and unsung. Perhaps it is the brain that brings the fame, again it might be the brawn; usually it is that fortunate combination of both qualities. Any organization is as successful as the individuals of which it is composed may make it, and the strong must always carry the weak. The youngsters pictured alongside may or may not appear in this volume many times, but each, in his own way, has done a great deal for C.V.S. and we hope the excellent effort will continue through life. Other heroes exist in our midst; we have tried to pick eight representatives of brain and brawn whose tireless efforts have urged us to say, "Thanks, kids!"

BOB ALGARIN must use those things in the left paw when the paw isn't pinning 95 pounders. AL BUNDY is amazed at Mr. JUST's rise on the Technimeter, competing with his own senior division, Al will write a speech about it. CARL CAMERA caught LOOPIN' LENNY with a book right side up; Bruno is probably reading about how to make 400 points in one season—check his grades folks! GEORGE JENNINGS is getting his props for the current editorial urge — where to, George, football, baseball, swimming, basketball, or are you going home? MR. SCHWANTES, who was crowned recently demurred a bit, but he looked pretty snappy at the prom with a local lovely. HERB "SNOWFLAKE" MARTINEZ is now trying to join the G.A.A. and the Advisory Council, he has done a great job with most of the other organizations. It's unfortunate it doesn't snow guys like these! Abbott and Costello surround Lillian and Bob in Hollywood and grins all around make the keen teens sparkle.

Administration

It is interesting to look back upon the history of that typically American institution, namely: free, tax-supported, compulsory education for all. We see in the distance the little one room schoolhouse where the teacher was the only guiding hand. As we think of the many important duties that confronted this individual, we are led to wonder just how much time he or she had to devote to imparting knowledge to students. Registration of students, the making of student programs, the recording and enforcement of attendance, adjustment of students and parent conference, coordination of curricula, and student placement in industry are all integral parts of the school. A corps of specialists handles this work today, thus taking it from the classroom that the teacher may devote his time to instruction. The success of any modern institution lies in its inter-departmental coordination and hence in the success of its administrators.

A great deal of pulchritude rules in our office; efficiency is a necessity and could you answer 10,000 questions via phone and counter and still smile? These gals seem to make it a daily diet with Mary Mooney at the helm. Miriam is secretary to the "boss man" and Virginia does that stuff for the Shop Superintendent. We understand she can sing too! The Vocations

Some of the lads are attempting a major operation on a PT-17. HOLM, standing, wrench in hand; ROWAN lying down on the job; JACOBSEN analyzing a wing, and GREGORSEN testing cables. CAROL CHANDLER (pretty cute in a black swim-suit) and a "runner-up" for Miss TECHNICIAN doubles as seamstress while helping DORIS WANDLAND with her wedding gown, (incidentally, the bells have rung.) JOE PHOTOG nabs miraculous action shot of LEROY HARBISON dreaming up a zoological garden. Delving into the problems of molecular phenomena are ALEX CESARO, RAY DINOVO, and CONRAD MAJESKI — PROFESSOR HACKETT kibitzing. These pioneers of plastics precious are assiduously producing articles of beauty and perfection. GEORGE SMITH is making an injection, CARTOPASSI must be doing something, SCHRAMEK mixes plastics and electricity, while HINZ admires an artistic gimmick.

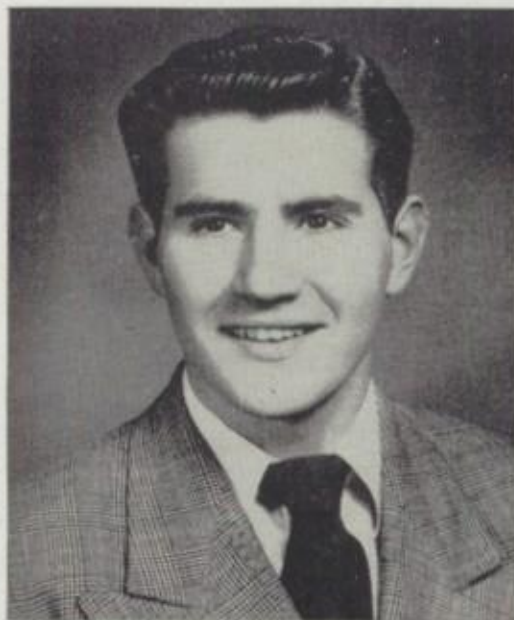

CLASS OF *June 1949*

MEMORIES

Yes, we'll have many of them in the future when we look over this 1949 TECHNICIAN and think of the good times we had in high school. Memories of the old C.V.S. Remember that old building at 80th and Normal? Remember the day we moved into the Palace? Since that time, there seems to be a better school spirit circulating among the students and the teachers. Such a spirit in any school gives everyone a favorable outlook on the opportunities that await him in later years outside school. This last year has held many memories for us seniors. Remember our Junior Prom, and how our wrestling team took the city championship? Remember how our basketball juniors lost the city title by one point? Remember the day we got our "beanies"? We were proud then. Yes, our four years had many things packed into them, and when we look over this book, there is but one thing to say — Thanks for the memories!

Our modest little schoolhouse covers a cite of approximately twenty-two acres. When one stops to think of such problems as: heating and ventilating; custodianship and security of plant; cleaning, main-

tenance, and repair of equipment and spaces; — it would seem that a tremendous force of operatives is necessary. It is — and we do have that force of trained operatives. A question or two might lead to some thought. How would you like to wash the windows at C.V.S. with a bucket and a chamois? How long would it take you to accomplish it? How would you like to build the heat up to seventy Fahrenheit in the classrooms on a zero Monday morning? Electric light bulbs do burn out and faucet washers must be replaced. The larger the plant and the more modern its equipment, the more is it dependent upon the success of its maintenance force. Hats off to you, boys!

Salad, Crumbs and Desert

We take great pride in our dining room which seats 1000 students three times each day and it can seat 1500. The privacy of the faculty dining room, which is adjacent, must be mentioned with the same emotion! The important idea is that the food is really swell and we can all afford to buy it. All this under the able direction of Mrs. Ford with her competent collection of culinary collaborators.

The "box man" snares HILDA HERMANSEN "dishing it out" to the gang. KENNY VOLGA is wondering if he can afford that filet. Why, "Hello, SYLVESTER," — aren't you going to eat?

Bulb boy sneaks into kitchen and drools as MRS. FORD and JULIA RUCINSKI decide how to divide the bird for student-wide consumption. The faculty? — Aye!

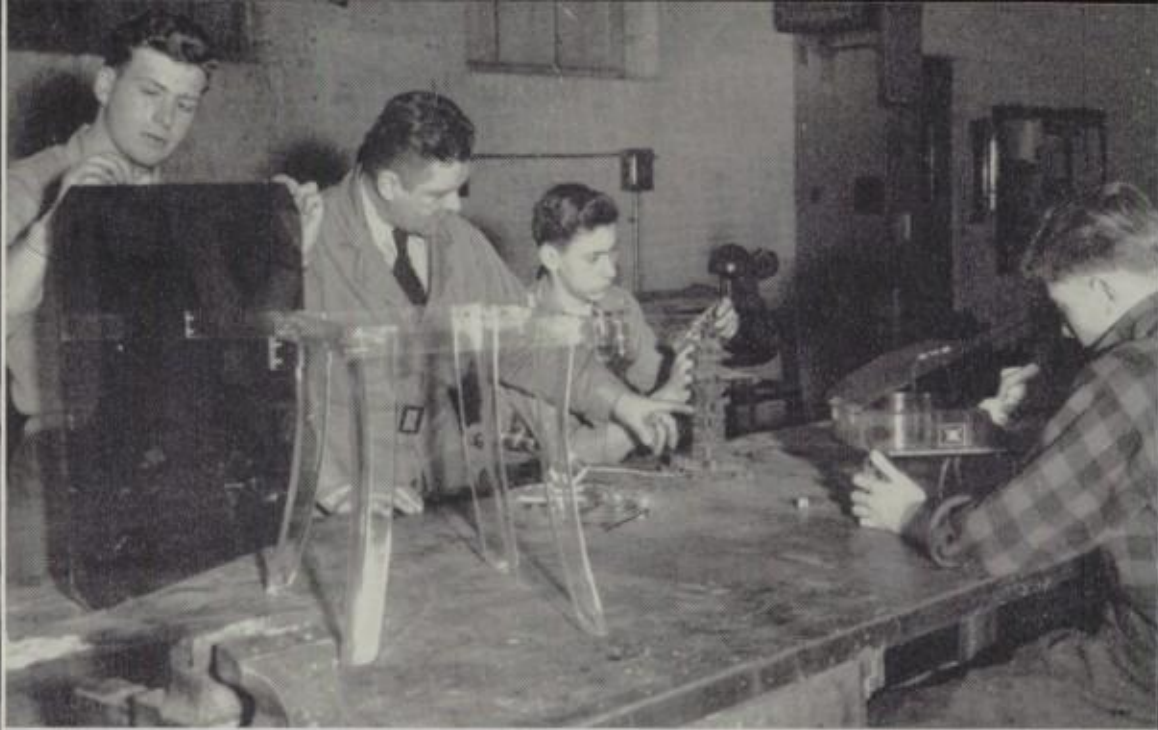

ANNA NIELSEN and AGNES WEBER are stopped with the hot stuff and good! The basement bakery, no less! The truck is almost ready for the elevator.

The Vocations

DAVE CHAMBERLAIN is being coached by MR. BROWN on the "tie in" of a common rafter down in "Hogan's Alley", ERNIE WISOLIK has MR. WANTUCH's attention as RAY HINES and RICH DWYER form the plastic stuff. MRS. CHARR is expounding to ELVIN GALEN that the itch for the stich makes the witch fit her niche.

RUSS ALLEN, DAVE NELSON, and RON BALSON seem dismayed that PROFESSOR EVERETT should mention armature winding.

Out the hangar door we see the F 4 F, the F 6 F, the S B 2 C 3 — the T B F — the Navy (in a kind sort of fashion) forgot 42 lethal weapons which have taught us a lot about aeronautical engineering.

CLASS OF *January 1950*

The midyear class of '50, the original aspiring intellectuals of the "Palace", entered this building in 1946, 585 "freshies" strong. The navy was still occupying most of the school; the gobs swabbing the hall decks daily. It was quite an experience for us "freshies" upon entering the school grounds to be halted by the navy sentries and required to present identification badges. At intervals throughout the day the scream of a siren, which sounded like a prison break could be heard over the intercom system. We enjoyed the novelty of this life for one semester, then the navy withdrew and in came the boys from 81st Street. The following semester we were to share our halls of learning with the fair young ladies. This event was enthusiastically welcomed by everyone??? Our class membership is now 263, and the class has contributed substantially to the scholastic, athletic, and social activities of the student body. These four years have been a most profitable and enjoyable experience. Before saying farewell we want to thank those who have so ably contributed to the profit and enjoyment of those years. Here's to the class of February, 1950, we know great accomplishments will be forthcoming from them, so good luck and God-speed.

LEO L. LEVERENZ

OUR Apprentice School is made up of students sent here by the industrial companies. The students are on the company pay roll and attend school here one day or a portion of it each week. Among the trades taught are: carpenters, pattern makers, electricians, machinists, boiler makers, blacksmiths, welders, tanners, and meat cutters.

Mr. Mitchell and Dr. Ewing are about to buy a chop or a bird — the boss gets around.

The Faculty

Our faculty numbers about one hundred thirty teachers. Their vocations and avocations make them versatile members of the teaching profession. JOE PHOTOG has caught them at an informal tea in the Civic Room when they gathered to welcome DR. EWING. Forty of them were members of the armed forces during the past two world wide conflagrations. Fifty of the men compete in

a bowling league annually, and the ladies have a league too. In the field of music, this group boasts a string quartet, two male quartets, and a six-piece dance band with a vocalist. Each is a specialist trained for his job and fitted to it through experience. The group includes sailors, boat builders, gardeners, "radio hams" philatelists, and airplane pilots.

Recreation

The C.V.S. Club Room was the result of careful thought and planning. It is located in the basement of the Central 87th Street wing. It is open for use of the students during the three daily lunchroom periods, and is always available for club parties. The room was decorated by the Commercial Art department and it is equipped with a piano, juke box, PA system, ping pong tables, and all manner of game equipment. There is a pantry in connection so that refreshments can be served. The student body is proud of this recreational facility and it is treated with great respect.

The Junior Prom

This party is an annual affair and is probably the most brilliant of the year. The dance is held in the school gymnasium and given by the Junior Class; it is supported by students at all levels and most of the faculty turn out. An excellent band is hired and much time and effort are put into decorations and lighting. The Prom Committee arranges some special stunt and the Grand March is led by someone in the student body spotlight. This year the stunt was the crowning of Miss TECHNICIAN who led the Grand March and the music was by Fritzie Freund and his band. Everyone was decked out in his or her finery, and gaiety plus festivity reigned.

The Undergrad Divisions

Upon entering C.V.S. as freshmen, the students are divided into groups of thirty, designated as a division, and assigned a teacher. It is custo-

mary for the group to remain with this teacher for the four year period unless unforeseen enrollment changes cause a division to be broken. The division is the real nucleus of the school.

THE CIVIL AIR PATROL

(Auxiliary of the U. S. Air Forces)

The Civil Air Patrol was organized some time prior to "Pearl Harbor" and our local unit was started in 1944. The unit aims to train licensed aircraft mechanics and in many cases trains pilots. These students are following the footsteps of their elders in training for the defense of their nation.

CHICAGO VOCATIONAL SCHOOL ANTICIPATES

Jolly Saint Nick

The carollers form 'round the lobby tree before their carolling stroll through the corridors. "GINNY" SMITH, CARMEL MOORE, and MARGARET CRUSAR gaze at a gay display. SHIRLEY plays Santa for Miss FALAHEY while LEEHEY is caught dancing around the Club Room tree. The lunch room gang have a party in the Civic Room; ELIZABETH RADTKE, LUCILLE SLOMKA, EVELYN DILLON, ELIZABETH KONECKI, and ANNE CHICARO help the boss-men with victuals.

We get a peak at our Home Economics Department looking through "Home Management" toward the "Foods Laboratory".

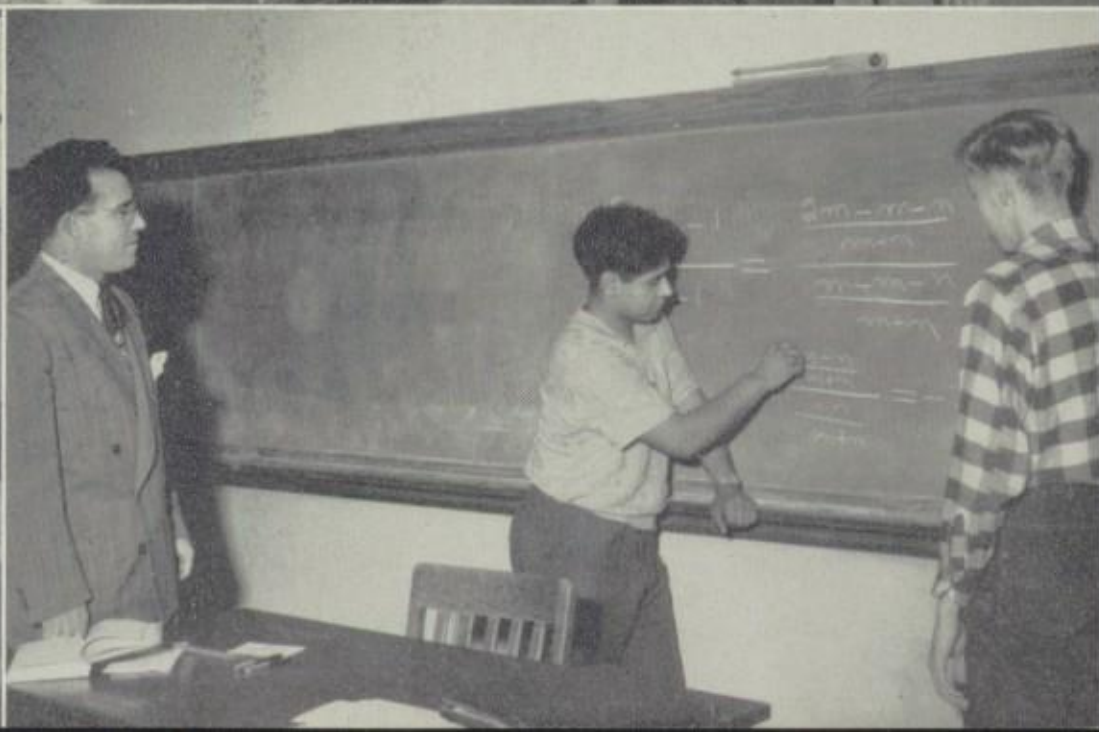

Our shutter-clicker must have donned a wig and a "new look" in order to invade the sanctity of the feminine area. It would seem that PAT AHEARN, ANGELINE BLASCZYK, OLGA ZOSLOW, and AUDREY KERSTIN are receiving last minute instructions from MISS GARDINER before the feathers begin to fly at volley ball.

EILEEN SUBUR is "listening in" while MYRTLE KOLARITS is on MISS FALAHEY's carpet, and oh boy — what a fancy carpet! The whole thing doesn't look too serious.

The Vocations

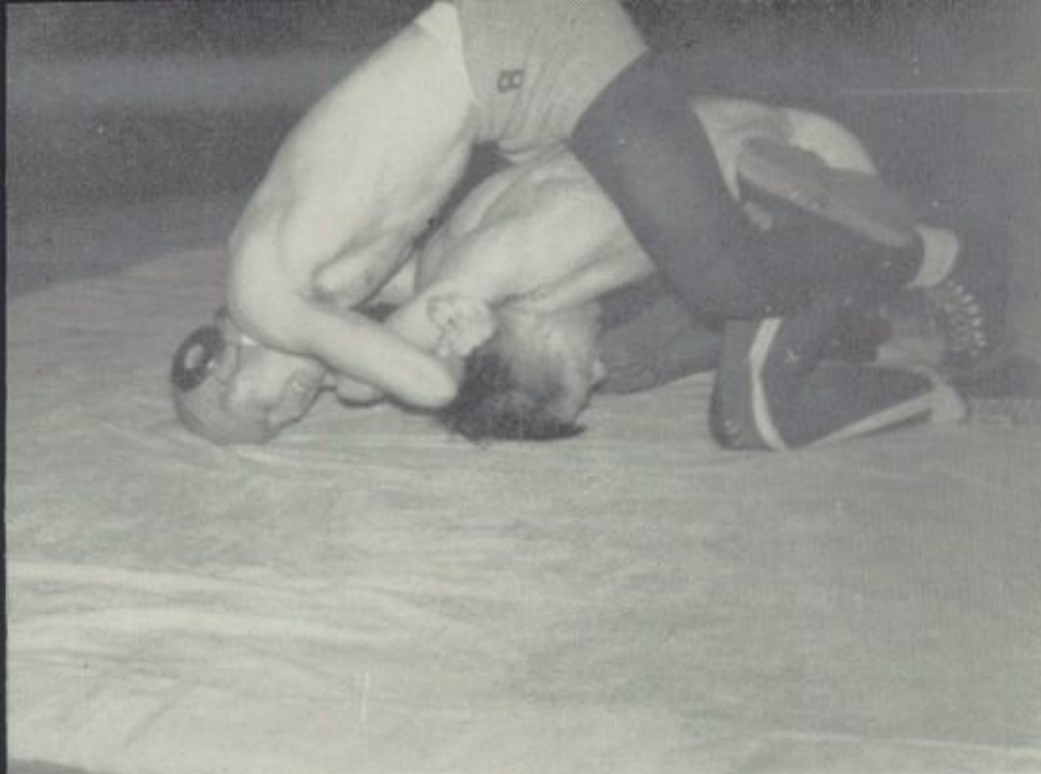

Looking over DAVE SYLVESTRI's shoulder we see some serious hand composition with WARREN PERRY and HAROLD HOLMES. LIPKA and ZAVALA have spotted the camera. That's SUSLOWICZ behind the forced air heating duct, and JOE FRANKER pounding his thumb. MR. STEPHENS is checking up on DON DINOVO's job. NOONAN, JARITZ, and GAMAUF are quite serious with that "plastic stuff". Can you fancy "SNOWFLAKE" MARTINEZ solving a math problem for MR. MILLER? We'll wager that HAROLD VAN KLEY helped out.

WRESTLING

Our grapplers were city champions this year competing against eighteen schools. In addition to league competition they grunted and groaned victoriously against Morgan Park Military, U-High of Chicago, both Washington and Roosevelt of East Chicago, Indiana, Morton of Cicero, and Mt. Carmel of Chicago.

AL VEGA appears to be the top wrestler C.V.S. has ever produced having won all of his 23 matches, 21 of which were pins. BILL DIANA won 18 bouts, 6 of them by pins, but he defeated the 175-pounder who won the state championship. BOB ALGARIN, city champ at 95 pounds last year, won 16 matches, 14 by pinning. This year's captains were JOHNSON, Jan. '49 and LADD, June '49. Next year the co-captains are VEGA and ALGARIN.

BASKETBALL

Perhaps the best story on basketball lies in the season's statistics which one will find on the next page. A team made up from both squads captured third place in the Illinois Tech season tournament. Both the senior and junior squads had wins in the city play-offs. Some records were broken; look at the scores.

SWIMMING

The aquatic aspirants aptly follow the directions of COACH DURKIN as he elongates on plunge and board form. In competing against seven schools twice each, the juniors won twelve matches while losing two. The seniors won three and dropped eleven of their fourteen matches. Bill Dingess, senior Captain and back-stroker, is not in the picture.

This is the game that requires brains and brawn plus many long hours of sweat and toil on the part of the players and their mentors. A veteran backfield was depleted by the ineligibility of PIONTEK and DUMONT, and POSTROZNY's going into the army.

Losses to Tilden and Hirsch showed the inexperience of our warriors, but a win over Bowen

showed progress and uncovered WOJCICKI as a strong running back. MARTINEZ exhibited great spirit in the line and BOND was the best all around ball player. Harper and Parker fell before this team, co-captained by DWYER and ADDUCCI. The Fenger score was not indicative of our playing as we piled up eight first downs to Fenger's four.

BASEBALL

They're wonderful! They're wonderful! They're wonderful! Mr. PEKELSMA's baseball team beat Lane Tech! We have RICH SERAFIN winding up for that "drop" that puzzles the umpires. "PEK" tells HANKO and TOTH about base-running. "HANK" PASKIEWICZ is ready to pound one out as JERRY PROKASKI hopes he will. STAN MARCELAK stops a hot one at second base. Graduation took three regulars from the infield, but the new blood is developing nicely. As we go to press, the club has a five hundred standing at mid season.

TRADEMASTER

Our bi-monthly publication is produced in our own print shops and is an eight page paper selling at five cents. It has a circulation of 2300 copies and is the vital publicity unit in the school. This publication certainly owes the Trademaster a big hand. Graduation will deplete the ranks of both the editorial and production staffs. The graduates are JENNINGS, LEENEY, SISKI, RYAN, HOLMAN, BRANTINGHAM, PAPAN, BUTTS, and LESTER.

EDITORIAL STAFF

DOWN BEAT

For the past two semesters the musically inclined portion of the student body has been organizing under the competent direction of REINHOLD STARK. Still in its infancy, the band got its start with five pioneers (we don't know how hungry they were) who hid away in a third floor nook and practiced every tenth period. The Maestro has recruited members, instruments, and drive as the aggregation now numbers twenty-two performers; he further states that city wide competition is not far away. We have heard of "boys with horns", perhaps the pics denote "horns with boys". ROBERT HODGE, tangled up in that sousaphone and NEIL ADAMS, supporting the baritone, certainly make up in volume what they may lack in tone quality.

THE ROLLERS

QUINLIN, CHERNICH, KAHNE, MAHONEY, ISMINGER, FIEFFER, ARNOLD, CRACHY, KERR, SMITH, MACFARLANE, MANOS, HAMMOND, WESTFALL, EKSTROM, HULS, LAMB, MR. Probably the most active organization in the school, the Rollers are still rather exclusive. Active membership is limited to fifty students and there is a considerable waiting list. Three absences from meetings terminates active membership. The skating parties are held at the Swank Rink and are always well patronized.

Each semester a dancing party is held which is free to the members in good standing; refreshments are served. Such parties have been held at Promontory Point in Jackson Park, at the South Chicago Y.M.C.A., and in the school Club Room. Emblems carrying the insignia of the club are awarded those members in good standing who contribute something definite to the group. Recently shirts have been presented to long term members in good standing. The Rollers are sponsored by Mr. West and their club is one of the oldest in the school.

HONOR SOCIETY

Like other honorary organizations this club has specific requirements for membership. To become a member one must have been on the honor roll for four semesters. Automatically one must be a 3B in order to meet requirements and many do not make the club until the senior year. Grades must average excellent and no grades of fair are accepted.

HALL GUARDS

This organization, under the able direction of Mr. Harold Hunter, is the largest one in the school. Corridor discipline and the security of more than eight thousand lockers both depend to a great extent upon this student group. Our guards are faithful and their civic points are hard earned.

THE ADVISORY COUNCIL

The young ladies in this organization are selected through faculty recommendation from among the juniors and seniors. This organization accepts the responsibility for setting and maintaining standards for young women at C.V.S. As "big sisters" they give freshmen information about school activities, courses, and opportunities. At the beginning of each semester the council aids in the registration of freshmen.

This is the gang that fought its way through these one hundred thirty-two *!/?;;*-&#-&-* pages. HUCK and WERHOLICK are helping MR. COE, the three dollar man, balance the books. ED BROWN and AL BUNDY are skeptical about breaking even, and Robertson is trying to locate Mr. HOWELER.

The TECHNICIAN show packed 'em in three times for free, and if the faculty band wasn't good, it was loud. MARILYN NELSON "canaried" the "bird song"; E. J. CONNOR, on tenor sax; "PETE" HOWELER on the alto; MRS. E. J. at the big box (and wotta handful of chords she has!); "AL" ADAMS on fiddle and vocal; GEORGE GORANSON with the open horn; J. B. on the "git-fiddle"; CARL SCHUESSLER at the skins, and VIOLA SCHNAKE, the canary.

The beauties are: T — CAROL CHANDLER, E — AUDREY PAUL, C — NEDA SKEVA, H — "GINNY" SMITH, N — PAT FARRELL, I — FLO MURAWSKI, C — JOAN SMITH, I — ETHEL BARCLAY, A — DOLLY POPOVICH, N — JACKIE BIANCHE.

ROSEMARY KATZMARK and BOB WAIG wowed 'em with their very professional waltz to "The Anniversary Song"; dancing is an avocation to this team. Our thanks to them are from the heart. JACKIE and E. J. sneaked into this shot — good of both.

TECHNICIAN STAFF

MARILYN WILLIAMS, JOE BARCLAY, and JOHN KACZMAR are getting some pointers on typographic design and layout. ED GRYCZEWSKI is trying to figure out whom he must run down next.

GINNY SMITH beats out the copy as "SNOW-FLAKE" MARTINEZ wonders how much more photography will fit the book. Ye editor, SCHATTENBERG, and ELINOR JOHNSON are wondering who cleared off the desk for the picture.
